49TH ANNUAL REPORT

Management Discussion and Analysis

Industry Structure and Developments

Overview of Tourism and Indian Economy:

Fiscal 2009-2010 started off on a note that the economy was decidedly on a higher growth path with the macro-economic fundamentals inspiring confidence and general optimism about the medium to long term prospects of the economy. As per Central Statistical Organization (CSO), the estimated growth in Trade, Hotels, Transport and Communications during 2009-10 is placed at 8.3%. The Indian Economy has withstood the global economic recession owing to the strong and well capitalized banks as well as influx of capital from the government in the form of Infrastructure spending. The increased spending on infrastructure development will also help boost the tourism industry.

In line with the trend in other sectors in 2009-2010, travel and Tourism activity in India as well was hit hard by the credit and housing market collapses experienced in many countries with households cutting back on leisure travel and corporations reducing business travel budgets. The Global economy is expected to move into a recovery phase, although the pick up in the developed economies is expected to be gradual as households, corporations and governments all battle to rebuild their balance sheets. In 2010, the travel and tourism is expected to generate 9-10% of the global GDP. International Tourist arrivals are forecast to increase by 2.5% in the Year 2010. In longer run, Travel and Tourism is expected to sustain its leading role in driving global growth, creating jobs and alleviating property.

Opportunities:

India is in the midst of unprecedented times due to the current economic scenario. The next few quarters are expected to be extremely challenging with companies doing everything necessary to overcome the challenges. Despite this, India's value proposition remains strong for sustained long term growth. The Hotel industry in India is expected to boom with rising room rates and on high occupancy rates. The Country is facing a shortage of hotel rooms and the industry needs to more than double its room inventory from the current levels. India is becoming the epicenter for outsourcing and new age businesses and the growth in the economy is attracting tourists from all around the world. With increase in the disposable income in the hands of people, domestic tourism has also been rising very rapidly. The demand and supply imbalance of hotel rooms is pushing average room rates (ARR) further as new properties are not coming up at the same place. This represents a significant opportunity for the Company.

Threats:

The Hotel industry is cyclical and sensitive to changes in the economy and this could have a significant impact on operations and financial results of the company. Act of violence or war, in India or other neighboring countries, may affect Indian and worldwide economic markets. Increased competition in the hotel sector may adversely affect the operation of our Hotel. Surging room rates may impact room demand from foreign leisure travel segment.

Outlook:

Despite a positive long term view, the current business environment remains challenging. The strong macro economic outlook is expected to continue providing momentum for growth of the hotel industry in India. It should be noted that that the base for tourism in India is still very low. The sudden surge in demand for hotel accommodation over the last three years has inflated hotel rooms in the country. However, a number of international brands across all hotel segments are planning to or have recently entered the Indian market. Domestic hotel chains, too, are embarking on strong expansion and development plans across all hotel segments. As the gap between supply and demand for hotel accommodation narrows over the next few years, we expect room rates to rationalize, which would encourage leisure travel.
